FLORIDA EYE

Microsurgical Institute, Inc.

REFRACTION POLICY

A refraction is a measurement of the lens power necessary to prescribe glasses or other corrective lenses. **Most medical insurance plans, including Medicare, do not cover routine refractions examinations** (when no medical eye problem is known or suspected). The Health Care Administration/Medicare allows that we charge separately for that portion of the examination, since it is not a covered service.

If you have a separate vision plan that covers routine or annual eye examinations and/or glasses, please let us know. Your vision plan may assist you with your eyecare needs that are not covered by your medical plan.

If you have any questions regarding Medicare and insurance policies and procedures, please do not hesitate to ask. We will do our best to assist you. Medicare will only pay for services that it determines to be "reasonable and necessary" under section 1862(a) (1) of the Medicare law. Refraction is not a Medicare covered procedure therefor will not be covered by Medicare.

PATIENT'S AGREEMENT

I have been notified by my doctor that an eye refraction is not a covered procedure and that Medicare likely to deny payment and I have agreed to be personally and fully responsible for the payment of \$25.00.
