

My Testimony Concerning Dr Barry Schechter, MD

I am a 80 yr old male, who had eye surgery for cataracts & trifocal lens (IOL) implants, beginning on Jun 17th 2021 by Dr Barry Schechter. Six weeks later, I am totally pleased with the work that he performed. I can now see clearly on all levels, closeup, mid-range, and distance, independent of wearing external eye glasses.

He is an outstanding confident ophthalmological surgeon, who assured me at all times that there would be no problem respecting my wishes during the surgery and healing process. He answered all of our questions before the procedure and made my wife and I feel very confident that he was the best doctor for me.

It is my pleasure to highly recommend Dr Schechter, for anyone who need Eye Surgery. You couldn't find a more caring and compassionate doctor. He restored my confidence in the medical profession all the way through Pre & Post Surgery of my eye cataract removal, and lens replacement; he never once doubted my successful recovery. He cautioning me on all the do's and don'ts for a successful recovery after surgery. In addition, his medical assistants were excellent towards me throughout the process along with all of the his other office staff.

My wife and I both thank you very much for your calm demeanor, total confidence, and providing a total care office environment. Everything was done at the Eye Institute facility and reviewed minutes later with me as his patient. You are the best Dr Schechter! Many thanks to you and your excellent staff. I have a new lease on seeing, reading, driving and best of all, totally independent of wearing glasses.
